

Governance, Risk and Compliance Cloud Services

The SecureWorks Governance, Risk and Compliance Consulting Service delivers the independent expertise, experience and perspective you need to enhance your security posture, reduce your risk, facilitate compliance and improve your operational efficiency.

As a leading provider of information security services, SecureWorks understands that managing and monitoring the risk and security level of your third party vendors can be a daunting task. Rely on SecureWorks to perform third party assessments of your current cloud providers and assist you in developing an overall programme to manage the risks.

SecureWorks will assist with establishing a strategic direction for gaining the benefits of the cloud while minimising risk and improving security. We will help you understand the ramifications of cloud adoption on your information security programme and policies, and will integrate cloud controls into your overall security programme.

What are the security measures that your cloud service provider (CSP) maintains, and what security measures should you maintain to ensure business-critical data is safe in the cloud?

- If you are already using cloud service providers, changing providers or exploring new providers, are you secure?
- Do you know how to measure security of your cloud service provider?
- Is your cloud service provider following regulatory and compliance guidelines?

Security Risk and Consulting

The SecureWorks Governance, Risk and Compliance experts are part of the Security and Risk Consulting practice, which provides expertise and analysis to help you enhance your security posture, reduce your risk, facilitate compliance and improve your operational efficiency. Before you determine which technology and policies you need to improve the strength of your security programme, work with a trusted partner who will assess and/or develop the right policies and procedures for your organisation.

Cloud Strategy Development or Assessment

Review and discuss how you define a strategy and manage the use of cloud service providers for your organisation.

SecureWorks Cloud Strategy Development experts will help you understand the ramifications of cloud adoption on your information security programme and policies and how to integrate cloud controls into your overall security programme.

If you are already using cloud service providers, SecureWorks can help conduct a controls assessment using our Cloud Strategy Assessment on your existing service providers.

Expert Testing, Analysis and Assessments

- Highly credentialed experts passionate about security
- Focused on security best practices for your industry
- Deep understanding of Compliance, Regulations and Security Frameworks
- Latest threat intelligence from SecureWorks CTU research team

Whether you are assessing existing CSPs or developing a new or changing cloud strategy, highly credentialed and experienced consultants will assess and provide recommendations on the following key domains of a cloud strategy:

Defining Requirements – identify your organisation's overall information storage and processing requirements to help understand the possible uses of cloud service providers which include efficiency benefits, cost savings and return on investment

Data Classification and Protection – classify and catalog the information types within your organisation so the strategy can be developed to provide the minimum security profile to specific types and classifications of data

Risk Assessment – perform a risk assessment on the use of cloud service providers in order to adequately assess which organisational data and/or functions might be appropriate

Benefits

A review of your cloud strategy helps establish the strategic direction so you gain the benefits of the cloud but minimise risk and improve security. Our consultants will ensure that you understand the ramifications of cloud adoption on your information security programme and policies and how to integrate cloud controls into your overall security programme. Additionally, we make sure you understand the security and compliance requirements of cloud deployment and how to manage them to maintain a strong security posture.

Cloud Service Provider Assessment

Whether you already work with a cloud service provider or are considering changing providers, SecureWorks assesses service providers by conducting a controls assessment utilising frameworks from bodies such as the Cloud Security Alliance (CSA), Cloud Controls Matrix and the US National Institute of Standards and Technology (NIST SP 800-144).

Benefits

Learn whether the cloud service provider has solid controls including adherence to any legal, statutory or regulatory compliance obligations among many areas, such as:

- Application and Interface Security
- Business Continuity Management and Operational Resilience
- Change Control and Configuration Management
- Data Security and Information Lifecycle Management
- Datacentre Security
- Encryption and Key Management
- Governance and Risk Management
- Human Resources
- Identity and Access Management
- Infrastructure and Virtualisation Security
- Interoperability and Portability
- Mobile Security
- Security Incident Management, E-Discovery and Cloud Forensics
- Supply Chain Management, Transparency and Accountability
- Threat and Vulnerability Management

Summary

SecureWorks Governance, Risk and Compliance services include experienced consultants who know where to look for compliance gaps with applicable mandates and recommend steps to remediate those gaps.

Deep understanding and knowledge of various compliance requirements guarantee an effective assessment to identify whether you are meeting compliance guidelines. Experts also provide additional direction to improve your cybersecurity.

About SecureWorks

SecureWorks provides an early warning system for evolving cyber threats, enabling organisations to prevent, detect, rapidly respond to and predict cyber attacks. Combining unparalleled visibility into the global threat landscape and powered by the Counter Threat Platform – our advanced data analytics and insights engine – SecureWorks minimises risk and delivers actionable, intelligence-driven security solutions for clients around the world.
