

Cyber Executive Protection

Complement Existing Executive Protection Programs to Include Cyber Component and Protect Your Organization's Reputation

The Cyber Executive Protection Service is designed to analyze cybersecurity risks to a Principal, Principal's family, and Principal's close staff.

Cyber Protection

Traditionally, the sole focus of Executive protection has been physical security. But with the proliferation of social media and other web activities that may jeopardize the information and privacy of Executives and their families, cybersecurity is an increasingly important, if often-overlooked, component of protection for an organization's Executives and brand.

How Secureworks Helps

Secureworks Cyber Executive Protection implements the most effective and appropriate safeguards to protect the Principal's personal information, reputation, online privacy, safety, and valuable time. This service ensures the Principal's organization does not incur damage to brand or reputation as a result of a successful threat scenario targeting the Principal. The engagement provides guidance on the regular monitoring of specific risk factors to ensure preparedness. If risks increase to an unacceptable level, additional courses of action are available.

Unique Framework and Approach

Secureworks has developed a unique assessment framework and approach that analyzes ten domains of risk to a Principal, Principal's family and Principal's close staff.

Activities

Interviews:

- Individuals responsible for handling Principal's technology
- Individuals responsible for the Principal's close protection team (e.g. Bodyguards)
- Principal's close staff members (e.g. Executive administrator, driver, pilot etc.) to assess any jump point style threats they may pose through their technology usage

Reviews and Assessments:

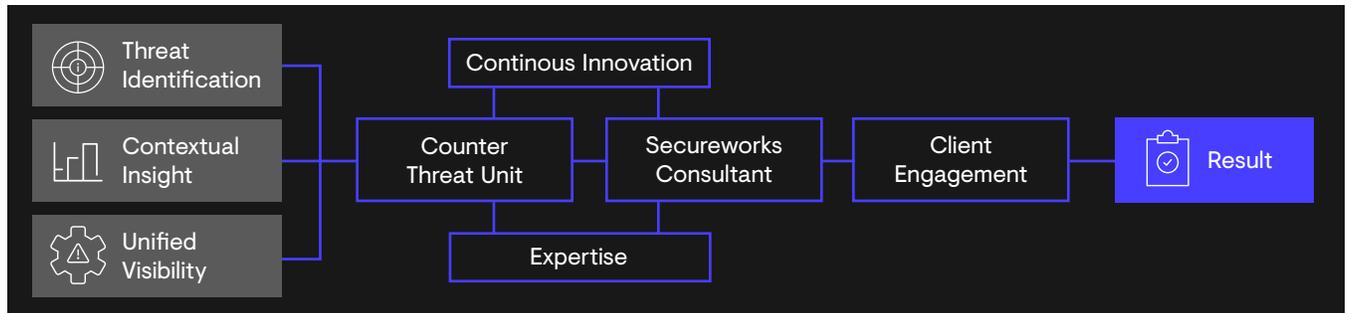

- Review of both the general and specific details of the technology in use by the Principal and their family (e.g. network diagrams, vendors that store their data etc.)

Client Benefits

- Protects organization from brand or reputational damage due to an attack on the Principal
- Safeguards Principals who are valuable assets of the organization
- Complements existing Executive Protection Programs making them fully comprehensive and inclusive of cyber component
- Optimizes Principal's valuable time

Solution Features

- Comprehensive assessment and analysis of cyber risk to a Principal, their family and staff
- Risk driven safeguard implementation and recommendations
- Tailored training for Principals and their family
- Highly unique assessment framework and effective approach
- Includes analysis of personal use of technology

- Assess digital footprint and cyber habits to determine how exposed Principal and their families are on the Internet (e.g. social media, organizations they belong to with Internet presences, ease of obtaining public records on them, etc.)

We know the tactics and techniques of threat actors, and we find ways to outsmart and outwit them. Our consultants leverage artificial and human intelligence to provide valuable, data-driven guidance to our clients.

Report and Deliverables

- Educational component provided to the Principal and their family which includes a discussion of cybersecurity and online safety
- Executive monitoring specifically focused on technology systems of the Principal
- Comprehensive recommendations on how to better secure the Principal and their families from a cybersecurity threat scenario

Continuous Innovation

At Secureworks, we harness the power of the network effect, applying practical intelligence derived from the field. Each incident response engagement, goal-based testing, threat modeling exercise, and consulting experience serves to secure our clients in a digitally connected world.

Expertise

At Secureworks, we are 100% security focused. We go beyond advising; we own and solve the problem and operationalize every process in between. Our consultants and innovative Security Center of Excellence (SCoE) will leverage lessons learned globally and apply them locally to your organization's unique needs.

Why Secureworks?

Integrated Threat Intelligence

With some of the world's most highly regarded security researchers, The Secureworks distinguished Counter Threat Unit™ (CTU™) Research Team is what sets us apart.

About Secureworks

Secureworks® (NASDAQ: SCWX) is a leading global cybersecurity company that keeps organizations safe in a digitally connected world. We combine visibility from thousands of clients, aggregate and analyze data from any source, anywhere, to prevent security breaches, detect malicious activity in real time, respond rapidly, and predict emerging threats. We offer our clients a cyber-defense that is Collectively Smarter. Exponentially Safer.™
